

"I am extraordinarily impressed. To my knowledge, you are the first expert in Germany who has addressed this particular topic in a scholarly impeccable and well-founded way. It is not for me to attribute an ice-breaker function to your expert report. It is easy to see which political-historical effects will originate from it, though its entire dimension cannot yet be estimated."

Prof. Dr. Hellmut Diwald, Historian, January 22, 1992

"I read it with great interest. [...] My impression is, however, that this expert report is an important contribution to a very important question which, since the 'Leuchter Report,' needs to be answered urgently. [...] One can only very much hope that the well-known tactics of hushing up is not applied to your expert report, but that critical responses and comments will be made."

Prof. Dr. Ernst Nolte, Historian, January 28, 1992

"For me, the significance of receiving your report rests on the fact that it substantially contributes to our stock of knowledge. With many of my colleagues active in the field of contemporary history, I am overjoyed and thankful for you having initiated this research activity. Of course, I am even more delighted regarding the results of your accurate scientific investigation."

Prof. Dr. Werner Georg Haverbeck, Historian, January 31, 1992

"I calmly read your report! It gives me hope to realize that a representative of the younger generation courageously sets out, with scientific thoroughness, noticeable great expertise, and corresponding investigative curiosity, to get to the bottom of a controversial question that is of worldwide significance! The result is clear and unequivocal! True facts cannot be suppressed forever! I wish that your work will make the breakthrough!"

Prof. Emil Schlee, Historian, April 1, 1992

"[...] I sincerely hope that all statements about this topic would obviously be based on long and intensive work such as yours. Most of it is certainly unverifiable for the layman, but the photographs are already quite informative. [...]"

Prof. Dr. Ernst Nolte, Historian, January 6, 1993

"Rudolf is a young scientist who tried to prove in an excellently layed-out work with tables, graphics, and so on, that the gas chambers were technically impossible. [...] These scientific analyses are perfect."

Hans Westra, Anne-Frank-Foundation, BRT 1 TV (Belgium), Panorama, April 27, 1995

"All in all, he relies on literature which was written long before this report was completed, and the report must be described as scientifically acceptable."

Prof. Dr. Henri Ramuz, Chemist, interrogated as expert witness about the *Rudolf Report* by the Swiss Court at Châtel-St.-Denis, May 18, 1997
